## MP3 File Compatibility

- ◆ This system can only read MP3 files that are recorded in the format that is compliant with ISO 9660 Level 1 or Level 2.
- ◆ The system can read or play MP3 files only with the extension code —“.mp3”.
- ◆ ID3\*tags cannot be shown on the display.  
\*An MP3 file can contain file information called “ID3 Tag” where its album name, performer, track title, etc. are recorded. There are two versions —ID3v1 (ID3 Tag version 1) and ID3v2 (ID3 Tag version 2).

## CD-R/RW playback compatibility

- ◆ Your DVD player can also play CD-R and CD-RW discs recorded in digital audio format. When recording your own CD-R or CD-RW discs, make sure that the recording session is properly terminated, or they will not be playable. (Depending on disc properties and recording quality, some CD-R/RW may not be playable.)
- ◆ CD-RW has a lower reflection rate than CD-R media and consequently it will take a longer to read CD-R discs.
- ◆ CD-RW discs recorded at high speed tend to be difficult for the DVD player to read. If the recording speed for the CD-RW disc is not predetermined, write it at low speed.

### ● Speaker Setting Methods

- ◆ Front Speakers  
Set the front speakers so that their tweeters (high-range) are aligned at about ear level and at a horizontal angle of 45° to the prime listening position.
- ◆ Center Speaker  
Ideally the center speaker should be positioned with its top surface flush with the front speakers. However, you may place the speaker either on top or near the bottom of your TV set.
- ◆ Rear Speakers  
Set the rear speakers further back parallel to the walls, at 60 to 90 centimeters (2 to 3 feet) above prime listening position ear level. If the space behind the listening position is insufficient (i.e., too close to the wall), place the rear speakers facing each other on either side.
- ◆ Subwoofer Speaker  
Place the subwoofer at any convenient location within the vicinity of the listening position.

## Safety Precautions

The following diagrams illustrate the precautions to be taken when using or moving your mini-compact system.

Ambient operating conditions:  
Ambient temperature 5°C-35°C  
Humidity 10-75%

Do not expose the unit to direct sun radiation or other heat sources. This could lead to overheating and malfunction of the unit.

Do not place potted plants or vases on top of the unit. Moisture entering the unit could lead to dangerous electric shock and can cause equipment damage. In such events immediately disconnect the main plug from the socket.

During thunderstorms, disconnect the main plug from the socket. Main voltage peaks due to lightning could damage the unit.

Remove the batteries from the remote control, if not used for any extended period. Leaking batteries can cause serious damage to the remote control.

When using headphones, take care not to listen at excessive volumes. Extended use of headphones at high volumes will lead to hearing damage.

Do not place heavy items on the main lead. Main cable damage can lead to damage of the equipment (fire hazard) and can cause electric shock.

Do not remove any equipment panels. The inside of the unit contains live components, which cause electric shock.

## Cleaning Your Mini-Compact System

To obtain the best possible results from your mini-compact system, you must clean the following elements regularly:

- ◆ The outer casing
